## PROJECTS

---

### BitSnip – URL Shortener | *React.js, TailwindCSS, Shadcn UI, Supabase (Auth & DB), Context API, React Router*

- Built a full-stack URL shortener with features like custom aliases, click tracking, and a minimal analytics dashboard.
- Implemented authentication, error handling, and real-time URL data storage using Supabase Auth and DB.
- Integrated Google Safe Browsing API to detect and block suspicious or malicious URLs before shortening.
- Used React Router for dynamic routing and Yup for robust form validation.
- Designed a fully responsive UI using TailwindCSS and Shadcn UI components; deployed the app on Vercel.

### Blog App – Full Stack Blogging Platform | *React.js, TailwindCSS, HTML, Redux Toolkit, Appwrite (Auth & Database)*

- Developed a full-stack blogging platform with rich text editor using TinyMCE, post creation/editing, and user authentication.
- Implemented secure auth using Appwrite Auth, with persistent login state.
- Managed blog data using Appwrite Database; performed CRUD operations for posts and users.
- Used Redux Toolkit for state management across user sessions, editor state, and API calls.
- Deployed on Netlify.
